Dear Students,

I know so much about caring for our Earth.

First, you can bring home anything you see in the woods. If you like it, take it with you!

When you’re done with your granola bar, throw the wrapper on the ground. Animals like to eat the wrappers.

Finally, you don’t have to stay on the trails. Walk wherever you want! That will keep you safe.

Sincerely,

Norbert Know-It-All
Dear Norbert,

Here are three facts we learned about caring for our Earth.

1. __________________________________________________
   __________________________________________________

2. __________________________________________________
   __________________________________________________

3. __________________________________________________
   __________________________________________________

Sincerely,

___________________________________
